

CHAPTER 3: WHAT IS A STOCK

WHAT IS A STOCK?

www.BursaMalaysia.com

**Known as Kuala Lumpur Stock
Exchange (KLSE) under
Securities Commission
Malaysia (SC)**

Equity= Share

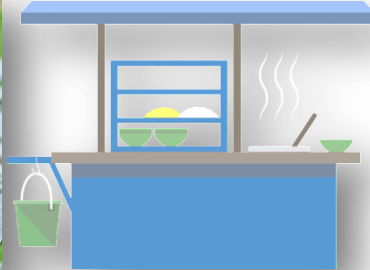

***known as securities**

Plain and simple, stock is a share in the ownership of a company. Stock represents a claim on the company's assets and earnings. As you acquire more stock, your ownership stake in the company becomes greater. Whether you say shares, equity, or stock, it all means the same thing.

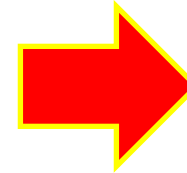

Business performance can be measured

1. Total increase in unit price
2. Dividends received
3. Bonus Issue (Unit Split)

HOW DO YOU KNOW THE STOCKS IS SHARIAH COMPLIANT?

Almost 88% of the listed company's core business is sharia compliance. Stock investment is legitimate as long as the stock you bought the core business ARE HALAL

In Share Investor Software, shariah stock usually ends with [S],
For example, **PENTA [S]**, **EVERGRN [S]**, **SKPRES [S]**, **HOMERIZ [S]**, etc.

Meanwhile to the "Non-Muslim", you have the advantages to choose either all shares regardless Non-Islamic Shariah or Shariah

Basic Idea About Structured Warrant

NOT FOR
NEWBIE

Call/Put warrants are being traded due to their leveraging concept in nature. Leveraging means they share exactly the same risk with derivatives. FYI, call/put warrants are created by Structured and Derivatives Department. Leveraging means you trade using a fraction of the mother price to control exactly the same market value.

Leveraging concept in a nutshell means it MAGNIFIES YOUR WINNINGS AND LOSSES AT THE SAME TIME

Delta Value:

Delta = Change in warrant price / Change in underlying share price. Meaning how many % the warrant price change vs the changes of the mother price. You need a higher delta so that when the mother price moves, the warrants will move in a higher %

Effective Gearing (Very important) = Gearing X Delta Value

% change of price of warrant vs the change of 1% in the mother price. You need a higher EG to have a meaningful fluctuations of warrant price.

Implied Volatility

It is a probability/estimation of future prices, rather. The higher IV, the probability of warrants futures price moves in tandem with mother price will be correlated. Higher IV, the better.

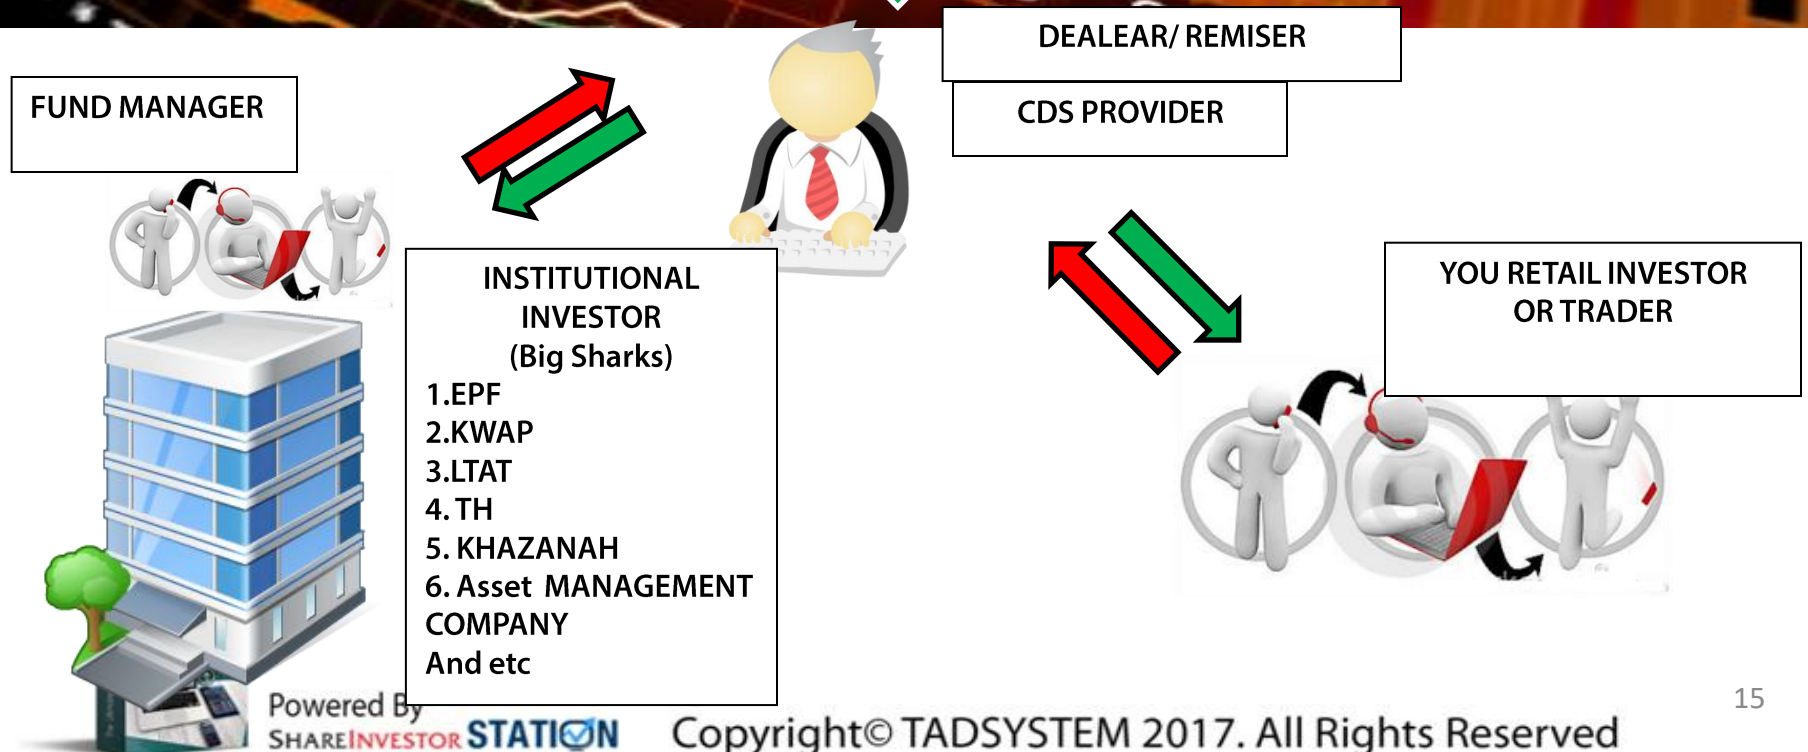

Morning Session
